Lucknow, Uttar Pradesh, India

Summary

Computer Science Engineering student with hands-on experience in Python, SQL, Software Development, Machine Learning, and Full-Stack Web Development. Built and deployed applications using Django, Streamlit, Scikit-learn, OpenCV, and FastAPI through industrial training and personal projects. Strong foundation in problem-solving, data structures, and developing practical technology solutions.

Education

Bachelor of Technology (Computer Science Engineering)

Dr. A.P.J. Abdul Kalam Technical University, Lucknow

Expected Graduation: 2027

Training / Experience

Data Science Trainee

Nov 2025 – Apr 2026

Softpro India, Lucknow

- Developed end-to-end data science and full-stack web applications using Python, SQL, Django, and Machine Learning.
- Performed data preprocessing, exploratory data analysis (EDA), feature engineering, and data visualization using Pandas and NumPy.
- Built, trained, and evaluated machine learning models using Scikit-learn for predictive analytics.
- Designed and deployed interactive web applications using Django and Streamlit.
- Used Git, GitHub, and Jupyter Notebook for version control, experimentation, and collaborative development.

Skills

- **Programming:** Python, SQL
- **Data Science:** Pandas, NumPy, Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA)
- **Machine Learning:** Scikit-learn, Supervised Learning, Feature Engineering, Model Evaluation
- **Data Visualization:** Matplotlib, Seaborn, Excel
- **Web Development:** Django, HTML, CSS, Bootstrap
- **Core CS:** Data Structures & Algorithms (Python), Object-Oriented Programming (OOP)
- **Tools:** Git, GitHub, Jupyter Notebook, Streamlit, VS Code

Projects

AttendAI – AI-Powered Multi-Face Attendance System

Ongoing

Python, OpenCV, WebRTC, Streamlit, Reassembler

- Developing an AI-based attendance system to detect and mark multiple students with a single click.
- Implemented real-time video processing and multi-face detection using OpenCV and WebRTC.
- Developed multiple Streamlit screens and completed the required system setup and core modules.

Online Admission System for Biotech Park, Lucknow

Django, Python, SQLite, Bootstrap

- Developed a full-stack online admission management system for Biotech Park Lucknow.
- Built secure Student and Admin dashboards for registration, application management and admission tracking.
- Integrated email notifications and an online payment gateway for application fee submission.
- Designed responsive interfaces using Django, HTML, CSS, Bootstrap and JavaScript.
- **Live Demo:** View Project
- **GitHub:** Repository

Mansik Santulan – Student Wellness Analytics

Python, Scikit-learn, FastAPI, Pandas, Numpy

- Developed a machine learning-based mental health prediction system to assess students' mental well-being.
- Performed data preprocessing, feature engineering, and exploratory data analysis (EDA) to improve model performance.
- Trained and evaluated multiple classification models, selecting the best-performing model for prediction.
- Built an interactive web application for real-time mental health risk prediction.
- **Live Demo:** View Project
- **GitHub:** Repository

Certifications

- **Data Analytics with Python** – NPTEL, IIT Roorkee
- **Cyber Security** – NPTEL, IIT Madras
- **Artificial Intelligence** – IBM SkillsBuild
- **Machine Learning, Generative AI & Artificial Intelligence** – IIT Kanpur
